EDUCATION

University of Maryland, College of Information Science

May 2026

B.S. in Information Science

Minor: Astronomy

Relevant Coursework: Database Design, Data Visualization, Statistics, Object-Oriented Programming, Web Development

- Dean's Award for Outstanding Undergraduate Research Achievement
- Alpha Chi Omega - Member / Chaplain Chair: Organized values-based programming and supported engagement for a 250+ member organization.

WORK EXPERIENCE

University of Maryland, College of Information Science

Undergraduate Research Assistant (HASIA)

Jan 2026-Present

College Park, MD

- Coded 130+ human-subject narratives across two datasets for a U.S. Army Research-funded study on AI-augmented team cognition and intelligence shift handover scenarios, applying multi-term qualitative codebooks in Excel.
- Calculated Cohen's Kappa inter-rater reliability coefficients across iterative batches of 40 narratives and maintained version-controlled coding sheets tracking agreement against senior researcher benchmarks.
- Reconciled discrepancies across 100+ narratives in 6+ consensus meetings and maintained a master Excel document integrating codebook definitions, coding outputs, and reliability metrics.
- Proctored live human-subject research sessions, monitored participant progress and study systems, and resolved procedural or technical issues in real time to minimize errors and protect data quality.

Information Science Undergraduate Teaching Assistant

Aug 2024-May 2026

College Park, MD

- Mentored and supported 50 students weekly in programming, data analytics, and foundational information science concepts through one-on-one and group instruction.
- Collaborated with the course instructor to design and refine lesson plans, assessments, and teaching materials for a cohesive and interactive learning environment.
- Led weekly study groups and office hours, adapting explanations to varied learning styles and helping students work through technical challenges.

Undergraduate Research Assistant (TORL)

May 2025-May 2026

College Park, MD

- Managed technical setup for research sessions using multi-camera video, audio, and hybrid Zoom systems to support high-quality data collection.
- Diagnosed and resolved hardware and software issues during live sessions, reducing disruptions and maintaining reliable data collection.
- Supported participant-facing research sessions by preparing equipment, monitoring recording systems, and following study protocols to ensure complete and consistent data capture.

Cornerstone Bar and Grill

Bartender & Marketing Assistant

May 2024-May 2026

College Park, MD

- Managed high-volume customer interactions in a fast-paced environment while maintaining accuracy, professionalism, and strong service quality.
- Created and managed content for the bar's TikTok account to support brand visibility and audience engagement.
- Trained new staff on procedures, communication standards, and workflow expectations, contributing to smoother team operations.

SELECTED TECHNICAL PROJECTS

Cheer Me Up - Full-Stack Wellness Application | Node.js, Supabase, Chart.js, Vercel

- Developed a mood-tracking platform with secure data persistence and a responsive user interface deployed through Vercel.
- Integrated third-party APIs for motivational content and built interactive Chart.js dashboards to visualize mood trends over time.

Dream Analysis - Object-Oriented Software Design | Python, JSON, Regex

- Designed an object-oriented Python application to collect, validate, search, and analyze qualitative dream journal data.
- Built keyword-overlap logic to identify recurring themes and narrative patterns across user entries.

Montgomery County Crime Database | SQL, MySQL, Database Design

- Designed and normalized a relational database containing Montgomery County crime data across seven interconnected tables to reduce redundancy and support analysis.
- Created SQL queries and reusable views to analyze crime patterns by offense type, police district, ZIP code, location, and dispatch time.

Ocean Intelligence Dashboard | Python, Pandas, Plotly, Streamlit, APIs

- Built and deployed an interactive Streamlit dashboard using 6,302 shark incident records, standardizing inconsistent fields and adding data-quality checks.
- Created Plotly visualizations and filters for species, country, year, activity, and outcome, integrated GBIF species taxonomy data, and enabled filtered CSV downloads.

SKILLS

- **Programming & Data:** Python, R, SQL/MySQL, JavaScript, HTML, JSON
- **Libraries & Tools:** Pandas, NumPy, Excel, Node.js, Supabase, Chart.js, Matplotlib, ggplot2, Plotly, Streamlit, REST APIs, Vercel
