PROFESSIONAL SUMMARY

Data-oriented Information Science undergraduate at the University of Maryland with hands-on experience in qualitative and quantitative data analysis, Python-based application development, and research data workflows. Skilled in Python, SQL, Excel, and data visualization tools. Dean's Award recipient with a track record of contributing to federally funded research and delivering analysis-ready datasets.

EDUCATION

University of Maryland, College of Information Science

B.S. in Information Science; Minor: Astronomy. Dean's Award for Outstanding Undergraduate Research Achievement.

College Park, MD

May 2026

EXPERIENCE

Undergraduate Research Assistant (HASIA)

Jan 2026 – Present

University of Maryland, College of Information Science

College Park, MD

- Coded and analyzed 130+ human-subject narratives across two datasets in under 2 months, applying multi-term qualitative codebooks to examine intelligence shift handover scenarios for a U.S. Army Research-funded study on AI-augmented team cognition.
- Computed Cohen's Kappa inter-rater reliability coefficients across iterative batches of 40 narratives, maintaining version-controlled data sheets tracking agreement scores against senior researcher benchmarks.
- Reconciled data discrepancies across 100+ narratives in 6+ consensus meetings, maintaining a master Excel document integrating codebook definitions, coded outputs, and reliability metrics.

Information Science Undergraduate Teaching Assistant

Aug 2024 – May 2026

University of Maryland, College of Information Science

College Park, MD

- Mentored 50 students weekly in Python, data analytics, and information science through one-on-one and group instruction.
- Collaborated with the course instructor to design and refine lesson plans, assessments, and course materials.
- Led weekly study groups and office hours, adapting explanations to varied learning styles to improve comprehension.

Undergraduate Research Assistant (TORL)

May 2025 – May 2026

University of Maryland, College of Information Science

College Park, MD

- Managed technical setup for research sessions, operating multi-camera video, audio, and Zoom systems for quality data collection.
- Diagnosed and resolved hardware and software issues during live sessions, minimizing disruptions and maintaining data integrity.

Bartender and Marketing Assistant

May 2024 – May 2026

Cornerstone Bar and Grill

College Park, MD

- Managed high-volume customer interactions in a fast-paced environment, maintaining accuracy and professionalism.
- Created and managed content for the bar's TikTok account to support brand visibility.
- Trained new staff on procedures, communication standards, and workflow expectations.

PROJECTS

Cheer Me Up - Full-Stack Wellness Application

- Engineered a mood-tracking platform using Node.js and Supabase with secure data persistence and a responsive UI via Vercel.
- Integrated third-party APIs for motivational content delivery and built interactive visual dashboards for mood analysis with Chart.js.

Dream Analysis - Object-Oriented Software Design

- Designed and implemented an object-oriented Python application for collecting and analyzing qualitative dream journal data, using regex-based validation to improve data consistency.
- Built a searchable thematic dictionary using keyword-overlap logic to identify recurring narrative patterns in user entries.

ACTIVITIES & LEADERSHIP

Alpha Chi Omega

Member / Chaplain Chair

- Organized values-based programming and fostered an inclusive community for a 250+ member chapter.

SKILLS

Technical Skills: Python, Pandas, NumPy, SQL/MySQL, Excel, Matplotlib, ggplot2, Plotly, R, HTML, JSON, Node.js, Supabase
